SKU-5003	WH-WEST	Hold	0	Monitor weekly	94.11	13	Inventory position (73.0) is within the policy range; model forecasts 94.1 units over the next 30 days.

Governance and interpretation

This report supports decisions; it does not create purchase orders. Validate recommendations against actual supplier calendars, order multiples, product expiry, and inventory freshness. Forecast performance should be assessed with time-based backtesting. A negative Promote quantity is an approximate excess quantity for markdown/clearance review, not an instruction to dispose of stock.
